Message from the CEO

As I noted in our Press Release dated May 20, 2021, strong demand for our products will be tempered somewhat with supply chain challenges. However, we believe we can mitigate many of these challenges which will likely persist through our first fiscal half of the year and we expect that price increases will further offset their effects as the year progresses. We are maintaining our guidance of \$1.15 to \$1.25 per as-adjusted diluted share for our first fiscal quarter.

David M. Shaffer, President and Chief Executive Officer, EnerSys

Net earnings attributable to EnerSys stockholders (“Net earnings”) for the fourth quarter of fiscal 2021 was \$33.8 million, or \$0.78 per diluted share, which included an unfavorable highlighted net of tax impact of \$22.7 million, or \$0.52 per diluted share, from highlighted items described in further detail in the tables shown below, reconciling non-GAAP adjusted financial measures to reported amounts.

Net loss for the fourth quarter of fiscal 2020 was \$1.5 million, or \$0.04 per diluted share, which included an unfavorable highlighted net of tax impact of \$49.0 million, or \$1.15 per diluted share from highlighted items described in further detail in the tables shown below, reconciling non-GAAP adjusted financial measures to reported amounts.

Excluding these highlighted items, adjusted Net earnings per diluted share for the fourth quarter of fiscal 2021, on a non-GAAP basis, were \$1.30, which met the guidance of \$1.25 to \$1.31 per diluted share for the fourth quarter given by the Company on February 10, 2021. These earnings compare to the prior year fourth quarter adjusted Net earnings of \$1.11 per diluted share. Please refer to the section included herein under the heading “Reconciliation of Non-GAAP Financial Measures” for a discussion of the Company’s use of non-GAAP adjusted financial information, which includes tables reconciling GAAP and non-GAAP adjusted financial measures for the quarters ended March 31, 2021 and March 31, 2020.

The Company announced on November 11, 2020, its plan to substantially close its facility in Hagen, Germany, which produces flooded motive power batteries for forklifts. The Company currently estimates that the total charges approximate \$60.0 million, the majority of which are expected to be recorded by the end of calendar 2021. Cash charges of approximately \$40.0 million are primarily for employee severance related payments, but also include payments for cleanup related to the facility, contractual releases and legal expenses. Non-cash charges from inventory and equipment write-offs are estimated to be \$20.0 million. These actions will result in the reduction of approximately 200 employees. The total charges for fiscal 2021 relating to this event amounted to \$31.3 million, which included \$8.0 million of non-cash charges.

Net sales for the fourth quarter of fiscal 2021 were \$813.5 million, an increase of 4% from the prior year fourth quarter net sales of \$781.8 million and increased 8% sequentially from the third quarter of fiscal 2021 net sales of \$751.1 million. The increase from the prior year quarter was the result of a 4% increase in organic volume resulting from the pandemic and a 2% increase in foreign currency translation impact, partially offset by a 2% decrease in pricing. The 8% sequential increase was due to organic volume improvement of 9%, partially offset by a 1% decrease in pricing.

On July 6, 2020, the Company announced that it was changing its reportable segments, beginning with its first quarter of fiscal 2021, from being based on geographic regions to lines of business. The new reportable segments are Energy Systems (which includes energy solutions related to telecommunications systems, uninterruptible power systems, and other power applications), Motive Power (which includes power for electric industrial forklifts used in manufacturing, warehousing and other material handling applications, as well as mining equipment, diesel locomotive starting and other rail equipment) and Specialty (which includes energy solutions for transportation, satellites, military aircraft, submarines, ships and other tactical vehicles). Prior year quarter and year to date financial information has been restated to reflect the new reportable segments.

The Company's operating results for its business segments for the fourth quarters of fiscal 2021 and 2020 are as follows:

	Quarter ended (\$ millions)

Net earnings for the twelve months of fiscal 2021 was \$143.3 million, or \$3.32 per diluted share, which included an unfavorable highlighted net of tax impact of \$50.8 million, or \$1.17 per diluted share, from highlighted items described in further detail in the tables shown below, reconciling non-GAAP adjusted financial measures to reported amounts.

Net earnings for the twelve months of fiscal 2020 were \$137.1 million, or \$3.20 per diluted share, which included an unfavorable highlighted net of tax impact of \$63.5 million, or \$1.48 per diluted share from highlighted items described in further detail in the tables shown below, reconciling non-GAAP adjusted financial measures to reported amounts.

Adjusted Net earnings per diluted share for the twelve months of fiscal 2021, on a non-GAAP basis, were \$4.49. This compares to the prior year twelve months adjusted Net earnings of \$4.68 per diluted share. Please refer to the section included herein under the heading "Reconciliation of Non-GAAP Financial Measures" for a discussion of the Company's use of non-GAAP adjusted financial information.

Net sales for the twelve months of fiscal 2021 were \$2,977.9 million, a decrease of 4% from the prior year twelve months net sales of \$3,087.8 million. The decrease from the prior year twelve months was the result of a 5% decrease in organic volume resulting from the pandemic and a 1% decrease in pricing, partially offset by a 2% increase from the NorthStar acquisition.

The Company's operating results for its business segments for the twelve months of fiscal 2021 and 2020 are as follows:

Reconciliation of Non-GAAP Financial Measures

This press release contains financial information determined by methods other than in accordance with U.S. Generally Accepted Accounting Principles, ("GAAP"). EnerSys' management uses the non-GAAP measures "adjusted Net earnings" and "adjusted operating earnings" as applicable, in their analysis of the Company's performance. This measure, as used by EnerSys in past quarters and years, adjusts operating earnings and Net earnings determined in accordance with GAAP to reflect changes in financial results associated with the Company's restructuring initiatives and other highlighted charges and income items. Management believes the presentation of these financial measures reflecting these non-GAAP adjustments provides important supplemental information in evaluating the operating results of the Company as distinct from results that include items that are not indicative of ongoing operating results and overall business performance; in particular, those charges that the Company incurs as a result of restructuring activities, impairment of goodwill and indefinite-lived intangibles and other assets, acquisition activities and those charges and credits that are not directly related to operating unit performance, such as significant legal proceedings, ERP system implementation, amortization of Alpha and NorthStar related intangible assets and tax valuation allowance changes, including those related to the adoption of the Tax Cuts and Jobs Act in the United States and the Federal Act on Tax Reform and AHV Financing in Switzerland. Because these charges are not incurred as a result of ongoing operations, or are incurred as a result of a potential or previous acquisition, they are not as helpful a measure of the performance of our underlying business, particularly in light of their unpredictable nature and are difficult to forecast. Although we exclude the amortization of purchased intangibles from these non-GAAP measures, management believes that it is important for investors to understand that such intangible assets were recorded as part of purchase accounting and contribute to revenue generation.

Income tax effects of non-GAAP adjustments are calculated using the applicable statutory tax rate for the jurisdictions in which the charges (benefits) are incurred, while taking into consideration any valuation allowances. For those items which are non-taxable, the tax expense (benefit) is calculated at 0%.

These non-GAAP disclosures have limitations as an analytical tool, should not be viewed as a substitute for operating earnings or Net earnings determined in accordance with GAAP, and should not be considered in isolation or as a substitute for analysis of the Company's results as reported under GAAP, nor are they necessarily comparable to non-GAAP performance measures that may be presented by other companies. Management believes that this non-GAAP supplemental information will be helpful in understanding the Company's ongoing operating results. This supplemental presentation should not be construed as an inference that the Company's future results will be unaffected by similar adjustments to Net earnings determined in accordance with GAAP.

A reconciliation of non-GAAP adjusted operating earnings is set forth in the table above, providing a reconciliation of non-GAAP adjusted operating earnings to the Company's reported operating results for its business segments. Included below is a reconciliation of non-GAAP adjusted Net earnings to reported amounts. Non-GAAP adjusted operating earnings and Net earnings are calculated excluding restructuring and other highlighted charges and credits. The following tables provide additional information regarding certain non-GAAP measures:
